ACTIVE SHOOTER SURVIVAL TRAINING

S.E.E.R. SCHOOL

For Corporate and Campus Environments

The Department of Homeland Security promotes a “Run Hide Fight” response to an Active Shooter, however, that only scratches the surface of survival. Vertus’ SEER training teaches tactical concepts of survival and incorporates them into live training exercises to prepare you both mentally and physically to “Be A Survivor”!

DO YOU KNOW HOW TO

**RUN TACTICALLY
HIDE EFFECTIVELY
FIGHT VIOLENTLY**

Most importantly, are you mentally prepared to do so?

Vertus is an Internationally recognized provider of Military and Law Enforcement training, known for developing and implementing the Congressionally Mandated Active Shooter Training for the US Army after the 2009 Ft. Hood Incident.

Vertus is the missing link in school site security. I had a wonderful experience with their training and their assessment fostered invaluable improvements in our security detail.

SURVIVE

The Survive part of the SEER Training is a huge part of the program. By using concepts common to the Israeli Commando’s plus five negative five Mind Set, students learn to develop and maintain the mentality of “I am going to win, right here, right now, I will not be a statistic.” Vertus’ “Mind Set” training overlaps into all of the concepts of SEER.

ESCAPE

Running away in itself may fall short should you find yourself in an Active Shooter situation. Learning how to escape and how to run “Tactically” can increase your chances of survival.. What can you do to cover your movements? Have you made a functional plan for escape? Vertus can help you build on these concepts.

EVADE

How do you evade the attacker and avoid exposure to sight picture? Learn what the difference is between Cover and Concealment.

RESIST

When all else fails, RESIST! You are never helpless! Vertus can make you tactically savvy by teaching you how to make improvised weapons from common objects around you. Learn what types of commonplace articles you can add to your surroundings that may one day save your life.

Begin the process today, let us teach you the knowledge to help save your life and others.

BE PREPARED | TAKE CHARGE | SURVIVE
